PROJECTS

Recognizing Student Ability

JavaScript, MySQL

- Developed a platform to help students and teachers collect and analyze data about student learning preferences and abilities.
- The page gathers information on various learning styles (kinesthetic, visual, auditory), classroom behavior (active participation, answering questions), extracurricular activities, and more.
- Includes a quiz section for students to answer subject-related questions.
- Generates a comprehensive graph of the student's abilities and preferences based on collected responses, aiding institutes in tailoring better learning strategies.

Tech Info

JavaScript, React.js

- Built an informative platform showcasing different technologies with detailed documentation and appealing visuals.
- Helps students explore and understand various tech domains, including their applications, potential career paths, and what they can build using these technologies.
- Encourages informed decision-making about career choices by illustrating the significance of each technology in real-world applications.
- Designed with a responsive and visually appealing interface, ensuring an engaging user experience for students.

INTERNSHIP

Eyesec Cyber Security Solutions Pvt Ltd

10/2023 - 11/2023

Full Stack Web Developer Intern

Belgaum, Karnataka

- Worked extensively on full-stack web development, utilizing technologies like HTML, CSS, JavaScript, React.js, Node.js, and MongoDB.
- Contributed to frontend development and portfolio projects, creating responsive designs and integrating dynamic web functionalities.

EXTRACURRICULAR

• Inter College Youth Dialogue Competition

KLS GIT, Belgaum

- Participated in the District Level Youth Dialogue Competition and was among the top 10 finalists.

• College-Level Chess Tournament

- Achieved a 1100 rating on Chess.com and actively participated in college-level chess tournaments.
